

Valley Plating Works Inc. offers Nickel & Chrome Plating on Stainless Steel

Commerce CA, January 18, 2016 - Valley Plating Works, Inc. is pleased to announce the addition of nickel and chrome plating on stainless steel to our list of services offered.

Located in the city of Commerce, California, Valley Plating Works, Inc. is a high quality electroplating company specializing in large orders with quick turn-around. Our areas of expertise include chrome plating, nickel plating, and zinc plating as well as barrel plating, rack zinc plating, and now, nickel and chrome plating on stainless steel. Valley Plating is the premier resource for all your nickel, chrome and zinc plating requirements.

Operating in the Los Angeles basin since 1931, Valley Plating is a family owned ISO 9001-2008 certified business, serving locally in Southern California and regionally in the rest of California, Arizona, Arkansas, Nevada, Utah, Idaho, Oregon and Texas.

Our nickel and chrome plating on stainless steel capability is incorporated into our fully automatic plating line. This allows us to utilize our reliable and proven plating systems, resulting in a high quality and consistent plated finish on your stainless steel products.

We use 3 layers of nickel plus your choice of trivalent chrome or hexavalent chrome to finish your parts. The addition of our durable decorative finish to your stainless steel products will ensure a long lasting and attractive appearance for many years.

Our plating on stainless steel process includes Woods Nickel Strike plus Semi Bright Nickel plus Bright Nickel plus Hex or Tri Chrome.

If you are interested in learning more about our plating on stainless steel or other services please contact Valley Plating Works Inc. at 323-838-9208. Please visit our web page at,
